TO-BE INVESTIGATION

Prepared by StatusNeo

DETECT	TRIAGE	GATHER EVIDENCE	DIAGNOSE	DECIDE / APPROVE	CAPA
0.1 day	0.2 day	0.4 day	0.5 day	2.0 days	40.3 days
illustrative / simulated	illustrative / simulated	illustrative / simulated	illustrative / simulated	illustrative / simulated	illustrative / simulated

Operator

Alert on the console
Northwater, MX-400 etch
Harness bar stays outside

Technician
No hand-off

Process engineer
Reads the rank

Quality engineer

HUMAN 3 · ERROR REMOVED E3

Opens the ticket
Recipe step stays on it
Takes the investigation

Supply chain
Lot is joined

Management

HUMAN 11 · ERROR REMOVED E10

Approves on the pack
Signed token, single use
The cause is cited

MPS agent platform
(StatusNeo)

AGENT 1 · ERROR REMOVED E1

SPC opens the ticket
Tool, chamber, and recipe
Nothing is spoken

AGENT 2 · ERROR REMOVED E2

Ticket is the alert
Tool, time, and symptom
Nobody retypes it

AGENT 4 · ERROR REMOVED E4

Reads the MES
Runs, lots, and recipe
Not a spreadsheet paste

AGENT 5 · ERROR REMOVED E5

Reads historian, SPC, ECN
Change log is in the pack
Not checked by eye

AGENT 6 · ERROR REMOVED E6

Retrieves prior cases
Onto the same ticket
Not from a folder

AGENT 7 · ERROR REMOVED E7

Joins the supplier lot
To the manufacturing run
Not an email lookup

AGENT 8 · ERROR REMOVED E8

One evidence pack
Each file is cited once
No meeting to reconcile

AGENT 9 · ERROR REMOVED E9

Ranks four cause classes
Cites what rules one out
Not the last known cause

AGENT 10

Pack is the ask
Citations are attached
No mail thread

AGENT 12 · ERROR REMOVED E11

Writes the CAPA
From the approved pack
Not re-keyed into the QMS

AGENT 13

Token is the signature
Already given at approval
No second signature

ERROR REMOVED callouts

11 agent steps replace a hand-off. 2 human steps remain: open, then approve. Illustrative / simulated.

Detect through Diagnose is 1.2 days to a hypothesis, simulated. CAPA at 40.3 days is the record cycle, simulated.

- E1 Spoken alarm. Statistical process control opens the ticket with tool, chamber, and recipe.
- E2 Ticket retyped. The alert is the record. Nobody retypes it.
- E3 Data gap. The recipe step stays on the ticket. A reply cannot drop it.
- E4 Spreadsheet paste. The run sheet is read, not pasted.
- E5 Missed engineering change. The change log is read into the pack.
- E6 Data gap. Prior cases are retrieved onto the ticket.
- E7 Wrong lot. The supplier lot is joined to the run lot.
- E8 Data gap. One evidence pack records which file was current.
- E9 Last-cause bias. Four cause classes are checked every time.
- E10 Uncited approval. The signed token cites the evidence pack.
- E11 Re-keyed record. The approved pack is written. It is not typed again.

Glossary

Short forms on this sheet, spelled out.

MES	manufacturing execution system
SPC	statistical process control
ECN	engineering change notice
QMS	quality management system
CAPA	corrective and preventive action

SC-5 spans Northwater and Ironwood. Escalation does not approve.

LEGEND

- Operator. Sees the alert on the console.
- Technician. No hand-off on this path.
- Process engineer. Reads the rank. Does not state it.
- Quality engineer. Opens the ticket. HUMAN 3.
- Supply chain. No email lookup on this path.
- Management. Approves. The human stays the approver.
- MPS agent platform (StatusNeo). Violet AGENT badge and arrow.
- Green ERROR REMOVED badge. E1 through E11, in the callout.
