MERIDIAN PRECISION SYSTEMS

Quality and Engineering Issue Resolution

INVESTIGATION FLOW

Prepared by StatusNeo

Evidence matrix

Produced at Rank causes, by the Resolution Agent.
Why-lines are written earlier, on each evidence item.

Root-cause class	Signals that support it	Signals that rule it out
Engineering change	A change order just before the shift, and only those tools moved	Maintenance the same week
Out of spec	Overdue calibration or alignment, on one chamber	A new material lot that week
Supply-chain material	A new lot of gas, chemical, or wafers on every tool that used it	A change order on one of those tools
Process drift	A slow ramp that tracks hours since the chamber was cleaned	Ordinary seasonal noise

Glossary

Console screens spell these out on first use.

SPC	statistical process control
CAPA	corrective and preventive action
MES	manufacturing execution system
QMS	quality management system
PLM	product lifecycle management
ERP	enterprise resource planning
CMMS	maintenance system for work orders
Gate	refuses a bare approve

LEGEND

- Agent step. Violet badge. No write.
- Deterministic. Dashed arrow escalates.
- Engineer. A bare approve stays off.
- Console. The harness bar is outside.
- Read-only tools, including scenario text.
- Model gateway. Completions only.
